Pipe Wrap - Mfr. Specifications		
<b>Application Time</b>	3 to 5 minutes	
<b>Bonds to all pipes (including)</b>	Galvanized Steel Stainless Steel Cast-Iron Fiberglass Copper Carbon Steel	PVC Concrete Aluminum Lead
<b>Available Sizes</b> Multiple rolls can be used for larger diameter pipes.	<b>RAP 122 (2 inches x 12 feet)</b>	Mfr recommends for repairs on 1-1/2" to 2" diameter pipe.
	<b>RAP 124 (4 inches x 12 feet)</b>	Mfr recommends for repairs on 2" to 4" diameter pipe
	<b>RAP 205 (5 inches x 20 feet)</b>	Mfr recommends for repairs on 4" to 6" diameter pipe
	<b>RAP 256 (6 inches x 25 feet)</b>	Mfr recommends for larger pipes
<b>Chemical Resistance</b> (Test Period 40 Days)	Hydrochloric Acid (30%) MEK Ethylene Glycol Ethyl Alcohol Sulfuric Acid (20%)	Ammonia Diesel Acetone Toluene Gasoline Xylenes
<b>Cure Time</b>	30 minutes at temperatures between 50F– 80F. Pipe Wrap may be cooled for at least 15 minutes before foil package is opened to add working and cure time. Heat may be applied to decrease cure time.	
<b>Shelf Life</b>	Two years if stored between 40F– 83F degrees and aluminum packet is not punctured. Storage at higher than recommended temperatures can reduce shelf life. Do not use if product is hardened. Rotate stock for best results.
